

# Data for Monthly McKinney-Vento Outreach Deliverables Reporting

Dates: 4/1/2023 - 4/30/2023

Alaska 2-1-1 Community Resource Specialists ask every caller if they have school aged children (age 3-21), Pre-K through 12th Grade in the household. Based on the answer from the caller a series of additional questions are asked to determine if a connection to a homeless liaison could offer additional support in the school system. Callers can decline to answer the first question and decline to share the demographic information of their children. Alaska 2-1-1 has 54 School District records included in the database. Based on the callers preference, Alaska 2-1-1 can automatically email the callers detailed information directly to the appropriate School District Homeless Liaison or provide the caller with the contact information for the appropriate School District Homeless Liaison.

## Student Demographic Data Summary\*\*

Gender	Veteran Status	Language****	Race/Ethnicity***
17   Male	17   No	20   English	9   American Indian or Alaska Native
12   Female	4   Yes	1   Asian and Pacific	1   Asian
			4   Black or African American
			3   Native Hawaiian/Pacific Islander
			5   White

**\*23 Non-Transactional calls:** non-productive i.e., misdial, hang-up, static, etc.

**\*\*3 Callers declined to share demographic information** but did want to be contacted or receive the referral

**\*\*\*Race/Ethnicity:** 6 Categories; American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Native Hawaiian/Pacific Islander and White

**\*\*\*\*Language:** 5 Options; English, Spanish, Alaska Native, Other Indo-European languages, Asian and Pacific Island. Additionally there is an other option. If Alaska Native is selected, there are 21 languages to select.

**The age item is a count of how many transactions occurred for each specific age.** For example, if one child is 3 and another is 9 then the transaction is counted for both ages one time per age. **The same is true for gender.** There are more than one form per transaction with different genders. The transaction is counted more than once for each different gender type. If there is 1 male and 1 female each with a form completed in a single transaction then this would total to 2 total genders even though both are in the same transaction.
